

FOURNET SOLUTIONS

FourNet Solutions + Turbot Overview

FourNet Solutions

FourNet Solutions is an SBA-approved Mentor-Protégé Joint Venture of Four Points Technology, LLC and Netizen Corporation, a Service-Disabled Veteran-Owned Small Business (SDVOSB).

Our capabilities include information technology products, services, and support including managed services, OEM equipment sales, cybersecurity, cloud computing, and software sales and support for all federal and defense agencies. We have combined our extensive past performance, expertise, talents, and supplier relationships to best serve government customers at every level for every mission type.

Turbot Guardrails

As enterprises increasingly rely on multi-cloud environments to power their operations, the challenge of keeping those environments secure, compliant, and well-governed has grown exponentially. Turbot Guardrails has emerged as a leading response to that challenge – a software-defined cloud governance platform that shifts organizations away from reactive, manual security toward a proactive, automated posture across AWS, Azure, and Google Cloud platforms.

Turbot Guardrails provides real-time, automated security, compliance, and operational controls across the major cloud service providers. Its primary focus is preventing misconfigurations, automating remediation, and managing identity/access controls at scale.

Core Security Capabilities:

-  Preventive Guardrails
-  Detective & Corrective Controls
-  Identity & Access Management (IAM)
-  Compliance Automation
-  Self-Healing Infrastructure

Platform Security Integrations:

-  AWS Security Hub
-  Cloud Native Services
-  ServiceNow
-  Turbot Pipes (Steampipe/Powerpipe)

By shifting them to a “preventive” security posture, Turbot helps organizations lower their security risks and reduce their compliance costs. For organizations navigating the complexity of modern multi-cloud infrastructure, Turbot offers something increasingly rare: a platform that does not just report on security problems, but actively prevents and resolves them.

Top 5 Reasons

TO USE BUYBOARD PURCHASING CO-OP

1 COMPLIANCE

BuyBoard members meet state and local purchasing requirements through the interlocal purchasing agreement.

2 SIMPLIFIED PURCHASING

Vendors are competitively procured and vetted so members don't have to go out for bid. BuyBoard is available throughout the United States, wherever use of purchasing co-ops is allowed.

3 COMPETITIVE PRICING

Combining the purchasing power of local governments allows members, big and small, the leverage to achieve better pricing through economies of scale and reduced RFQ administrative costs.

4 TRUST AND TRANSPARENCY

BuyBoard is member focused and member governed by a board of directors and has been serving school districts and state and local governmental entities nationwide since 1998.

5 CHOICE AND VALUE

With a wide range of offerings from more than 70 contracted vendors, members will find everything from pens and pencils to fire trucks and buses to support their organization on BuyBoard. Our vendors are diverse and range from small regional-based to large national vendors.
